

Multimedia Appendix 3. Spearman's rank correlation coefficients between the online social features and the BDI scores

	Facebook Social Features								
	Groups	Group admins	Interests	Likes	Pending requests	Location tagging	Friends	App- points	App-tips
Spearman's rho	-0.127	0.011	-0.160	-0.136	-0.043	-0.266	-0.288	0.374	0.385
P value	.36	.94	.24	.32	.76	.05	.03	.005	.004

The number of location tagging and friends was negatively correlated with BDI score ($P = .05$ and $P = .03$ respectively), while the App-points and the number of App-tips viewed had positive correlation ($P = .005$ and $P = .004$ respectively).
