

TITLE	key	Notes
Patient self-reporting in palliative care using information technology: Yes, there is hope!	[1]	Editorial
Pain and palliative care pharmacotherapy literature summaries and analyses	[2]	collection of literature summaries
Daily life as an Australian medical oncologist	[3]	not specifically on palliative care
Outpatient palliative care: Does it matter?	[4]	conference abstract
Future planning to upgrade the pediatric oncology service in the Baghdad children welfare teaching hospital	[5]	Pediatric
Annual convention: Paramedics and emergency doctors of air rescue service met in Wurzburg	[6]	no ehealth intervention and no users' needs
Triangulation analysis of tele-palliative care implementation in a rural community area in Japan	[7]	no ehealth intervention, no users' needs
Factors associated with attrition from a randomized controlled trial of meaning-centered group psychotherapy for patients with advanced cancer	[8]	treatment evaluation (psychotherapy)
[The palliative care day hospital mobile team]	[9]	French
[Supporting caregivers in the palliative care unit (interview by Severine Coste)]	[10]	French
Palliative care intervention for choice and use of opioids in the last hours of life	[11]	no ehealth intervention and no users' needs
Effects of a palliative care intervention on clinical outcomes in patients with advanced cancer: The project ENABLE II randomized controlled trial	[12]	no ehealth intervention and no information needs
Nursing diagnoses recorded in palliative care documentation. A systematic review	[13]	review on nursing diagnoses related to palliative care
Adopting and introducing new technology to improve patient care: a wedding of clinicians and informatics specialists	[14]	no eHealth
The use of modelling to evaluate new drugs for patients with a chronic condition: The case of antibodies against tumour necrosis factor in rheumatoid arthritis	[15]	report on cancer treatment, not palliative care itself
Online courses for nurses working in palliative care	[16]	report on nursing education, not palliative care as such, no users' needs
The veterans health administration system of care for mild traumatic brain injury: Costs, benefits, and controversies	[17]	report on Polytrauma System of Care, not palliative care itself
Paediatric palliative home care with Internet-based video-phones: lessons learnt	[18]	pediatric
Using videotelephony to support paediatric oncology-related palliative care in the home: from abandoned RCT to acceptability study	[19]	pediatric

Improving access to palliative care through an innovative quality improvement initiative: An opportunity for pay-for-performance	[20]	paper on how to increase access to palliative care, no ehealth or users' needs
[The helping relationship. Collaboration between the nurses of a palliative care mobile unit and the nurses of the clinical services]	[21]	French
[Specific missions for the mobile palliative care support teams]	[22]	French
A rapid response veteran affairs outpatient palliative care consult team (316-B)	[23]	conference abstract
Vaginal and pelvic recurrences in stage I and II endometrial carcinoma - Survival and prognostic factors	[24]	report on prognostic factors in cancer
Radiotherapy and chemotherapy in patients with primary invasive vaginal carcinoma	[25]	treatment report
Renewing primary care: Lessons learned from the Spanish health care system	[26]	vision paper on health system development, no individuals' information needs
Oncology's transitional generation: Charting the way to integrated, efficient, and cost-effective delivery systems	[27]	Commentary
[Development of palliative care in the Vaud canton. 3 mobile teams are in place]	[28]	French
Home telemedicine for paediatric palliative care	[29]	Pediatric
Studying the effectiveness of palliative care [1]	[30]	Letter
A framework for measuring quality in the emergency department	[31]	Commentary
Introducing 'Palcall': an innovative out-of-hours telephone service led by hospice nurses.	[32]	Neither user needs nor efficacy
Translating research into practice: Reducing gastrostomy tube placement in advanced dementia patients (711)	[33]	conference abstract
A pediatric oncology nursing outreach program	[34]	Pediatric
The role of radiofrequency ablation in the treatment of primary and metastatic tumours of the liver: Initial lessons learned	[35]	no palliative care as such
Development of terminology subsets using ICNP(registered trademark)	[36]	not on palliative care as such but on nursing terminology
[Activities of a nurse of a palliative mobile unit]	[37]	French
Single-ventricle palliation for high-risk neonates: Examining the feasibility of an automated home monitoring system after stage I palliation	[38]	pediatric, no palliative care

Transitions in care during a palliative care program: Distribution and associated factors	[39]	no ehealth, no users' needs
[Palliative care by a mobile team: objectives and missions, qualities and difficulties]	[40]	French
Patients at highest risk for venous thromboembolism are not receiving specific discharge instructions warning for signs and symptoms of VTE: A double setback	[41]	conference abstract
Palliative treatment of esophageal carcinoma	[42]	treatment report, not palliative care
Effectiveness of a geriatric palliative care consult on pain management and advance directives among older adults	[43]	conference abstract
Making an impact on 30 day heart failure readmissions: A comprehensive and collaborative effort begins	[44]	conference abstract
The feasibility of telephone follow-up led by a radiation therapist: Experience in a multidisciplinary bone metastases clinic	[45]	synchronous communication, no palliative care
Colorectal stenting in large bowel obstruction: Our experience	[46]	conference abstract
Ontario pharmacists practicing in family health teams and the patient-centered medical home	[47]	no palliative care as such
Bridging the distance: a prospective tele-oncology study in Northern Norway	[48]	No palliative care
The impact of a modular HIV/AIDS palliative care education programme in rural Uganda	[49]	no ehealth, no users' needs
Study protocol: Optimization of complex palliative care at home via telemedicine. A cluster randomized controlled trial	[50]	synchronous communication, no users' needs
[Mobile team of palliative care. Role of the nurse in relation to hospital nurses]	[51]	French
Organizing palliative care for rural populations: A systematic review of the evidence	[52]	no ehealth intervention, no users'needs
Patients' perceptions of services and preferences for care in amyotrophic lateral sclerosis: A review	[53]	no ehealth intervention, no users' needs
Ambulatory oncology consulting team: A bridge between the oncology department and staff in the community health care in the county of Stockholm, Sweden	[54]	no eHealth
Journal of Medical Imaging and Radiation Sciences: Message from the Editor	[55]	Editorial
Recognition and management of acute medication poisoning	[56]	no palliative care as such
[Lois or the end of life of a child suffering from cancer]	[57]	French

Amoxicillin for acute rhinosinusitis: A randomized controlled trial	[58]	Medication trial
[Mobile palliative and supportive care unit]	[59]	French
Stora luckor i journaler vid vard i livets slutskede	[60]	article in Swedish
Thyroid cancer: possible role of telemedicine	[61]	synchronous communication, no palliative care
Patients' opinion of weekend cover by palliative care general practitioners	[62]	report on care organisation during weekends
Why, How, What, and nullSo What!null developing clinical informatics tools for determined skeptics	[63]	conference abstract
A narrative literature review of the evidence regarding the economic impact of avoidable hospitalizations amongst palliative care patients in the UK	[64]	no ehealth intervention, no users' needs
Specialty services for children with special health care needs: Supplement not supplant the medical home	[65]	pediatric
Which cancer patients are referred to hospital at home for palliative care?	[66]	study on treatment decisions, no users' needs
In this issue	[67]	Editorial
Supportive care assessment: Patient preferences for disclosure of palliative care information	[68]	conference abstract
Out-of-hours prescribing: A survey of current practice in the UK	[69]	report on prescription practice, not palliative care itself
Preliminary analysis of midlevel practitioners on pain and health-related quality of life and function for a palliative care service at a comprehensive cancer center	[70]	letter to the editor
Hospices' Preparation and Practices for Quality Measurement	[71]	no ehealth intervention, study on quality of care
Technical data evaluation of a palliative care web-based documentation system	[72]	technical evaluation, no efficacy, no users' needs
Analysis of the suitability of 'video-visits' for palliative home care: implications for practice	[73]	synchronous communication, no users' needs
Informatics-enabled behavioral medicine in oncology	[74]	no palliative care as such
Improving medication reconciliation in an outpatient palliative medicine clinic: A quality improvement study	[75]	study on medication discrepancies
Expert consensus on diagnostic criteria and tertiary service requirements for bronchiectasis	[76]	treatment evaluation
A history of patient education by health professionals in Europe and North America: from authority to shared decision making education	[77]	Historic overview, no original research

Knowledge and Attitude toward Hospice Palliative Care among Community-Dwelling Aged Taiwanese-Analysis of Related Factors	[78]	no ehealth intervention, no users'needs
Surgical palliative care in Haiti	[79]	no ehealth intervention or information needs
Videotelephony: An innovative mode of palliative care service delivery in regional and remote areas	[80]	Pediatric
Heart failure management programmes in Europe	[81]	study on heart failure management, not palliative care
Using the internet to improve the study and management of pain: Could the health system meet our expectations?	[82]	report on pain management, not palliative care as such
An approach for incorporating advanced care planning into heart failure specialty care	[83]	conference abstract
Pelvic reirradiation for recurrent or new primary gynecologic malignancies	[84]	conference abstract
UK telehealth initiatives in palliative care: A review	[85]	synchronous communication, no users' needs
Using technology in palliative care - A reality	[86]	conference abstract
Use of Norethindrone Acetate Alone for Postoperative Suppression of Endometriosis Symptoms	[87]	pediatric
From skype to smart phones: Uses and limits of telehealth in palliative care	[88]	Conference abstract
Empowering local people to run a mobile palliative care service	[89]	no research report
Who says medical education hasn't changed?	[90]	video file
e-Health in pediatric palliative care	[91]	Pediatric
Information seeking behaviors of parents whose children have life-threatening illnesses	[92]	Pediatric
Does evidence-based medicine really reduce costs?	[93]	not on palliative care as such
Spiritual issues in palliative care consultations in the Netherlands	[94]	report on spiritual issues, not an ehealth intervention or information needs.
Videophones for the delivery of home healthcare in oncology	[95]	synchronous video-telephony, no users' needs
[Palliative care mobile team at a Parisian university hospital]	[96]	French
[What is expected of psychologists in palliative care mobile teams? Their role and missions]	[97]	French
Comparison of uncovered stent with covered stent for treatment of malignant colorectal obstruction{A figure is presented}	[98]	treatment evaluation, no palliative care
Poor Effect of Family Practice Physician Training at the Organizational Level in Long-Term Care Facilities in Flanders, Belgium	[99]	letter to the editor

Communicating with children and families: From everyday interactions to skill in conveying distressing information	[100]	Pediatric
Feasibility of symptom and quality-of-life (QOL) assessment in a VA network-based palliative care (PC) program	[101]	conference abstract
Out-of-hours palliative care advice line	[102]	letter to the editor
Use of radiation treatment units in breast cancer. Changes in the last 15 years	[103]	overview article on radio therapy, not palliative care
Is it reliable to use cellular phones for symptom assessment in palliative care? Report on a study in patients with advanced cancer	[104]	letter to the editor
Using telehealth technology to support CME in end-of-life care for community physicians in Ontario	[105]	no ehealth intervention, no users' needs
Pediatric palliative care and eHealth: Opportunities for patient-centered care	[106]	Pediatric
Analytic review: Mass-casualty incidents: How does an ICU prepare?	[107]	No palliative care
Telemedicine is crucial for improving access to specialist renal care and management of renal disease in remote/rural locations	[108]	no palliative care
Validation study of an end-of-life questionnaire from the Swedish Register of Palliative Care	[109]	no ehealth intervention, no users' needs
The radiologist as a palliative care subspecialist: Providing symptom relief when cure is not possible	[110]	no ehealth intervention, no users' needs
International collaborations in cancer control and the Third International Cancer Control Congress	[111]	report on cancer control in general
New developments in the detection and treatment of depression in cancer settings	[112]	report on depression with cancer patients
Use of ISDN video-phones for clients receiving palliative and antenatal home care	[113]	synchronous video-telephony
Home videoconferencing for patients with severe congenital heart disease following discharge	[114]	Pediatric
Psychosocial supportive care: An effective and integrated team approach	[115]	no ehealth intervention, no users' information needs
Using electronic triggers to identify patients at risk for diagnostic delays in prostate cancer	[116]	no palliative care
Telemedicine in radiation oncology: Challenges and opportunities	[117]	synchronous communication
Palliative chemotherapy during the last month of life	[118]	no ehealth intervention, no users' needs
Entering our fourth decade	[119]	Pediatric

News from the 40th European symposium on clinical pharmacy; 18-21 October 2011; Dublin	[120]	conference report
A university oncology department and a remote palliative care unit linked together by email and videoconferencing	[121]	synchronous communication
Dr Shipman's last legacy: E-surveillance of the medical profession	[122]	editorial
Mortality within 30 days of chemotherapy: A clinical governance benchmarking issue for oncology patients	[123]	statistics on mortality, not palliative care as such
Evaluation of rebound ascites following discontinuation of bevacizumab in recurrent ovarian cancer	[124]	conference abstract
The mobile phone as a tool in improving cancer care in Nigeria	[125]	report on cancer care, not palliative care
Family medicine in 2018	[126]	no palliative care
Osteoradionecrosis of the Mandible: Treatment Outcomes and Factors Influencing the Progress of Osteoradionecrosis	[127]	report on cancer treatment, not palliative care
Retrospective analysis of 191 patients with advanced hepatocellular carcinoma treated with transarterial chemoembolisation (TACE): Validation of the established and construction of an improved HCC-staging-system	[128]	report on cancer treatment, not palliative care
Home care for advanced cancer: Results and challenges	[129]	no eHealth intervention, no user needs
Palliative cancer patients and their families on the Internet: Motivation and impact	[130]	series of case studies, but unclear if cases are real or fictional
Palliative care on the Net: an online survey of health care professionals	[131]	general description of Internet usage, not related to palliative care
Analysis of the activity of a palliative care support team	[132]	no EHealth
Older rural Australian men with prostate cancer: Mapping their patterns of care	[133]	conference abstract
Health behaviour interventions for cancer survivors: An overview of the evidence and contemporary Australian trials	[134]	health education for cancer survivors
Null!m afraid! what happens? null EPR and decision making	[135]	conference abstract
Logistic aspects in emergency care of the elderly	[136]	emergency care, not palliative
The challenges of building and sustaining a pediatric neuro-oncology program in a developing country	[137]	Pediatric
Implementation of the screening for Palliative Care Needs in the Emergency Department (SPEED) instrument in two emergency departments	[138]	conference abstract
Nurse Practitioner led Palliative Care Program	[139]	conference abstract
[Palliative care hospital units]	[140]	French
Using videoconferencing in palliative care	[141]	synchronous communication

Videoconferencing and palliative care	[142]	synchronous communication, no users' needs
[Bretonneau mobile team, a bridge between the hospital and the community]	[143]	French
Combined interventional radiological therapy and radiotherapeutic treatment of patients with carcinomas of the extrahepatic biliary tract	[144]	Oncological treatment evaluation, no palliative care
A coping and communication support intervention tailored to older patients diagnosed with late-stage cancer	[145]	No ehealth
Telemedicine across the ages	[146]	report on symmetric communication, no users' needs
What kind of requests do healthcare professionals make of a telephone out of hours specialist palliative care advice service? The experience of one hospice over a year [3]	[147]	Letter to editor
Telephone consultation in palliative care in remote thar desert of India: 3 Years of experience	[148]	conference abstract
Telemedicine in community-based palliative care: evaluation of a videolink teleconference project	[149]	synchronous communication, no users' needs
In vivo dosimetry in electron beam teletherapy using electron paramagnetic resonance in L-alanine	[150]	report on treatment method, not palliative care
Out-of-hours palliative care provided by GP co-operatives: Availability, content and effect of transferred information	[151]	no ehealth intervention, no users' needs
GI-cancer patients education: Status of cultural economical and social perceptions in developing nations	[152]	Education on cancer, no palliative care itself
MHWD Telepsychiatry Project 2004	[153]	no palliative care
Life after the women's health initiative: Evaluation of postmenopausal symptoms and use of alternative therapies after discontinuation of hormone therapy	[154]	no palliative care
Telemedicine as a tool for evaluation of retinopathy of prematurity	[155]	no palliative care
Quality-of-care implications of improving physician communication through a Web-based tool	[156]	conference abstract
Re-irradiation of recurrent and/or persistent squamous cell carcinoma of head and neck region	[157]	treatment report
Patient safety incidents in home hospice care: A qualitative study of interdisciplinary hospice team members	[158]	report on patient safety
Oncology patient-centered medical home and accountable cancer care	[159]	no ehealth intervention, no users' needs
[Mobile team for palliative care in Geneva]	[160]	French

Rationale, design, and implementation protocol of the Dutch clinical practice guideline pain in patients with cancer: a cluster randomised controlled trial with Short Message Service (SMS) and Interactive Voice Response (IVR)	[161]	conference abstract
Early palliative care for patients with metastatic non-small-cell lung cancer	[162]	no ehealth intervention, no users' needs
Longitudinal perceptions of prognosis and goals of therapy in patients with metastatic non-small-cell lung cancer: Results of a randomized study of early palliative care	[163]	no ehealth intervention, no users' needs
"You can't always get what you want" - Or can you?	[164]	commentary
Screening for psychological distress in palliative care: performance of touch screen questionnaires compared with semistructured psychiatric interview.	[165]	Validation of a touch-screen survey. Not effectiveness or users' needs
Duodenal stents are associated with more durable patency as compared to percutaneous endoscopic gastrojejunostomy in the palliation of malignant gastric outlet obstruction	[166]	no ehealth intervention, no users' needs
Self-expanding metal stents (SEMS) for patients with advanced Esophageal cancer in Malawi: An effective palliative treatment	[167]	report on treatment, not palliative care as such
Marmara Medical Journal: From the editor	[168]	Editorial
[Cancer pain, a palliative care team approach]	[169]	French
Tele-practice guidelines for the symptom management of children undergoing cancer treatment	[170]	Pediatric
The effectiveness of palliative care education delivered by videoconferencing compared with face-to-face delivery.	[171]	videoconferencing, no user needs
The Long-term Efficacy of Pneumatic Dilatation and Heller Myotomy for the Treatment of Achalasia	[172]	no palliative care
Home Oncology Medical Extension (H.O.M.E.) - an effective alternative to hospital care	[173]	no eHealth intervention
Multidisciplinary longitudinal approach to patients with high admission rates	[174]	conference abstract
Immediate or delayed palliative teleradiotherapy patients with advanced non small cell lung cancer?	[175]	palliative teleradiotherapy, not palliative care
Improving outcomes for people with progressive cancer: Interrupted time series trial of a needs assessment intervention	[176]	no eHealth intervention, no users' information needs
Chronic heart failure: promoting quality of life	[177]	no EHealth

Incorporating goals-of-care conversations into hospital admissions at a system-wide level: Policy and educational strategies (306)	[178]	conference abstract
Reflexology for symptom relief in patients with cancer	[179]	no ehealth, no users' needs
Family discord and proxy decision makers' end-of-life treatment decisions	[180]	evaluation of treatment decision (before palliative care)
Systems for the management of respiratory disease in primary care - an international series: United Kingdom	[181]	report on health care system
Advance care planning among the oldest old	[182]	no ehealth, no users' needs
Experiences of 24-hour advice line services: a framework for good practice and meeting NICE guidelines.	[183]	sort of a whitepaper.
Implementing a patient administration system	[184]	report on administration system, no users's needs
The elephant in the room: Negotiating meaningful advance care planning with patients, Families, and clinicians of diverse backgrounds and cultures	[185]	conference abstract
