Community

- Can community service staff use the part of the digital program that is relevant to them?
- Can caregivers and family assist patient in using the digital program that is relevant to them?
- Do community services have the necessary staff time to use the part of the digital program that is relevant to them?
- Do community services have the financial means to have the necessary technology?
- What are the organizations existing procedures for information exchange?
- Are community clinicians, social service personnel and caregivers using the digital program as they are intended to?
- Have service leaders explained the importance of using the system?
- What is the volume of data transmitted from community services?
- How long do community service staff and patients stay logged into the system?
- What different types of activity are
- Can the digital program communicate with the IT programs already in place in the community services?
- Can the digital program communicate to/from the community setting to the other three care settings?
- What is the impact to community services in terms of structure, process, outcomes and finances?
- Does the digital program have signaling capabilities to alert community care when costly services are being requested?
